Profile

A versatile and creative web developer that's quick and keen to learn new technologies and find simple solutions to complex problems. Academic and self-taught programming skills, enhanced by constant research and professional development. I regularly participation in hack-a-thons and meet-ups.

Work Experience

Freelance Web Developer   **10/2016 – present**
Remote

Project # 1 Tasky
Technologies Used: Ruby on Rails, JavaScript, jQuery, Bootstrap, ERB, CSS3

Tasky is a project managing tool that organizes your projects into boards. Main features of *Tasky* include:
- Devise to manage user authentication and *Omniauth* to allow users to login/signup using their Facebook account.
- Bootstrap for the styling so the finished product looks decent and responsive.
- Markdown syntax, Particle.js background, Link detection, Font Awesome Icons, and custom error messages.

Project # 2 BeerMe
Technologies Used: Ruby, Nokogiri, OpenURI

BeerMe is a command-line interface app that *scrapes* data from Beer Advocate's Top 250 Beers List. Main features of *BeerMe* include:
- Users may select a beer by inputting the number on the list to find out more details.
- Beer details include a list of breweries beer styles and the beers that belong therein.
- Results present each beer in a list, along with the corresponding brewery and style.

Education

Computer Science   **01/2018 – present**
Victor Valley College, Victorville, Ca, USA
Current GPA: 4.0

Full Stack Development   **04/2017 – present**
The FlatIron School, Online, USA
Courses taken include: Ruby/Rails, JavaScript, C++, Node and Bootstrap

Personal Info

On my off time, I enjoy researching upcoming technologies to stay ahead of the learning curve. I like to take my dog "Dooko" out for walks, go out to eat at new restaurants, drink coffee, (lot's of coffee!) and travel to new places. One of the great benefits of being a web developer is being able to work remotely, as long as the internet connection isn't too weak. I also like to get some gaming in while I can. Big PUBG fan (on PC), message me if you feel like putting your skills to the test.
